

High Security Personal Checks

High Security checks are specifically designed with multiple layers of defense to protect against fraud. With modern copiers producing duplicates that rival originals, it's easier than ever for fraudsters to copy and fake a check. But Deluxe has been in the check business for over 100 years, and we've pioneered security technology that makes our High Security checks virtually impossible to copy.

Stop fraudsters in their tracks. Provide the financial security that account holders expect with **Deluxe® High Security Checks**, featuring the very latest high-tech safeguards available today.

Security Square

Cannot be reproduced by copiers or scanners.

Personalized Microprint

Your name and the check number, in tiny letters, that appear as a solid line until magnified. Cannot be reproduced by a copier.

Heat-Reactive Ink

The ink color fades when warmed by touch. If copied, the color will not fade.

Microprint Signature Line

The signature line is actually tiny letters that appear as a solid line until magnified.

Chemical Wash Detection Area

Chemical alteration attempts result in stains or discoloration in this padlock area.

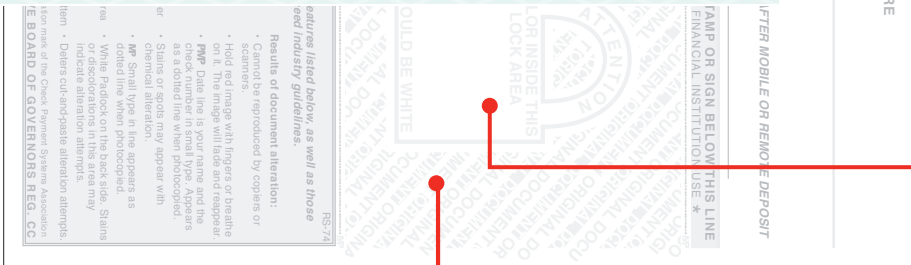

Fraud Warning

Indicates that high-security features are present to deter fraudsters.

Original Document Back Pattern

Deters cut-and-paste alteration attempts.
